

Inception Workshop: Enhancing Mekong-Lancang Research and Policy Dialogue Program

Apsara Palace Resort and Conference Centre, Siem Reap

21-22 June 2018

The Cambodia Development Resource Institute (CDRI) implements a two-year-research program called “Enhancing Mekong-Lancang Research and Policy Dialogue Program”. This research will provide empirical evidence and policy suggestions to the Mekong-Lancang country dialogue, with a focus on “Agricultural Trade between China and the Greater Mekong Sub-region Countries: Value Chain Analysis” and “Contract Farming in the Mekong-Lancang Countries: Best Practices and Lessons Learned”.

CDRI works closely with Mekong-Lancang country institutional partners from Cambodia, China, Lao PDR, Thailand, and Vietnam. It will organise an inception workshop in Siem Reap province on 21-22 June 2018.

The purpose of this workshop is to inform national stakeholders and Mekong-Lancang country institutional partners about this research program and seek their comments and suggestions on its relevance to national and regional policy.
